

I have been notified that the FCC is contemplating changes that would effect my local FM radio coverage by either eliminating or significantly limiting my ability to listen to 90.1 AIR 1 radio station. AIR 1 is currently the only radio station that my family and I currently listen to, it is a non-profit station which I have been supporting for the past two years. The music played on AIR 1 is an encouraging brand of music and is good for the community and its citizens. They provide a family friendly station and help promote healthy family friendly concerts throughout this and many other communities. The station also provides an uplifting alternative for my wife and I during our morning and afternoon commutes to and from work in the heavily congested Southern California area. Displacing AIR 1 with an LPFM broadcaster is a bad idea thousands of Southern California listeners would be left without a suitable replacement station, that provides Alternative Uplifting Christian Music. All of us AIR 1 supporters pray that you make the right choice and leave AIR 1 (90.1, 89.5, 100.7) on the air in its current format.
